

## WHEN THE SCHOOL GIVES LOTS OF HOMEWORK

Many of us may feel differently regarding homework. For example, some of us might feel okay with homework; some might notice our child not being OK with homework etc.

Side note: There's lots of research around homework demonstrating that it is not beneficial to students.

There are many options & things we can do around homework. Here are some ideas if you don't like the idea of homework:

- Get the weekly homework out of the way by doing it over the weekend.
- Children can do as much as they can without any pressure in the evenings
- No homework at all.

**Having a discussion about how we feel, how our child feels & the decisions we've taken around homework is best to be shared with our child's teacher.**
